

ABBA AUTHENTICS - Complete Web Application Code

This document contains the complete HTML, CSS, and JavaScript code for the ABBA AUTHENTICS mobile-first web application. The application is integrated with Supabase for authentication, database management, and storage.

1. Project Setup & Instructions

- **Dependencies:** This project uses the Supabase JavaScript SDK via CDN.
 - **Icons:** Google Material Icons are used for the interface.
 - **Configuration:** The Supabase URL and Public Key provided in the prompt are pre-configured in the script.
-

2. HTML & CSS (The Structure and Style)

```
